CORE COMPETENCIES

- Software Development
- Site Reliability Engineering
- Application Engineering and Modernization
- Information Security and Risk Management
- Development Engineering

CUSTOMER EXPERIENCE

Defense Human Resource Activity

Air Force Special Operations Command

Air Education Training Command

SOFTWARE SERVICES

Palladium has expertise in designing, implementing, refactoring, complex government software solutions. Developers have worked multiple high-visibility projects including the Joint Special Operations Cloud Computing Environment (JOSCE), the Air Force Learning Management System (AF-LMS)/Joint Education Training System (JETS), and Multiple applications providing direct support to congressionally mandated DoD programs.

CYBERSECURITY SERVICES

Palladium developers have direct experience implementing DoD RMF in a Cloud Computing Environment at Information Protection Levels 2, 4, 5 and 6 (Secret). Palladium can help throughout the cybersecurity lifecycle from Information System Categorization through Continuous Monitoring.

CLOUD COMPUTING

Palladium has deep experience developing and supporting commercial cloud solutions ranging from single applications to complex, multi-tenant environments with integrated security components.

TAILORED DEVELOPMENT & ENGINEERING

Palladium has experience following development and engineering practices modeled after DoDAF and ToGAF including command specific tailoring. Palladium has extensive experience with agile software development.

"THE COMPLIANCE FACTORY"

A highly customizable framework that addresses compliance holistically. While many vendors provide solutions that address specific portions of the puzzle, they lack interoperability and require significant manual intervention.

Palladium uses its **Compliance Factory** approach to enable a rapid, proof-positive operational sustainment lifecycle based on organizational policy.

The Palladium Difference: Our focus is on bridging the gap between the small, mission essential applications and the enterprise environments within which they operate. By fostering a strong customer intimacy and breaking down complex tasks in a meaningful and understandable manner, Palladium achieves success even when complex integrations are required, and resources are limited.
